E6 – FINAL PROJECT

1. Type the problem you would like to solve.
2. What's the tool, device or app you came up with to solve the problem?
3. How can it help people?
4. Creating an app is not an easy task. A lot of thinking is required. The developer has to create a plan, conduct a research and identify a market, for instance. Taking this into consideration, what steps were followed to develop the app/tool/device?
5. What is it used for/what will it be used for?
6. Can our lives be improved by your invention? How does your invention make life better or easier?
7. What kind of people can benefit from your invention? Who would the product be used by? Explain why.
8. Explain how the world was before and how it can be after your invention.
9. How can the world be impacted by it?
10. Where can you buy it / download it?
11. How much does it cost (or is it for free)?
12. Describe your product.

Use words that make people want to buy it/download it:

SUPERLATIVE - it's the best, the most efficient, the greatest, the fastest, the cheapest…

ADJECTIVES: new, modern, essential, recyclable, ideal, natural, fast, resistant, superior, fun, durable, perfect...

Obs.: The written project must answer all questions below. Use images, pictures, graphics, and anything else you believe it will be interesting and useful for the written project. It is worth 2.0.

Obs.2: The final presentation must be 5-10 minutes long.

Obs.3: Individual or in pairs.
